## Assignment Name: Student Registration Form

### Description: Use of all input types within an HTML form

Create a registration form using only HTML. This form should help you understand how to use various form elements like input fields, radio buttons, checkboxes, dropdowns, and more.

---

### Requirements:

Build a form with the following fields:

- **Full Name** – `input type="text"`
- **Email Address** – `input type="email"`
- **Password** – `input type="password"`
- **Phone Number** – `input type="tel"`
- **Age** – `input type="number"`
- **Date of Birth** – `input type="date"`
- **Preferred Class Time** – `input type="time"`
- **Gender** – radio buttons (`Male`, `Female`, `Other`)
- **Hobbies** – checkboxes (e.g., `Reading`, `Sports`, `Music`, `Coding`)
- **Country** – select dropdown (at least 5 country options)
- **Profile Description** – `textarea`
- **Rate Your Interest (1–10)** – `input type="range"`
- **Favorite Color** – `input type="color"`
- **Upload Resume or Photo** – `input type="file"`

- **Your Website (if any)** – `input type="url"`
  - **Search Your Favorite Subject** – `input type="search"`
  - **Hidden Field** – `input type="hidden"` (use any value like `user_id = 123`)
  - **Agree to Terms and Conditions** – `input type="checkbox"`
  - **Submit Button** – `input type="submit"`
  - **Reset Button** – `input type="reset"`
  - **Click Me Button** – `input type="button"`
- 

### Instructions:

- Use proper `<label>` tags for each input.
- Save the file as `index.html`.
- No CSS or JavaScript is required.

### Submission Deadline:

**Today, before 8:30 PM (class starts at 9:00 PM)**
